Career and Education

since 2020 **PostDoc**,
Department for Astrophysics/IMAPP/Radboud Universiteit, Netherlands.
Advisor: Prof. Dr. Marijke Haverkorn

2017–2020 **PhD in Astrophysics**,
Max Planck Institute for Astrophysics/Ludwig Maximilians Universität, Germany.
Thesis topic: Magnetic Fields in our Local Universe
Doctoral Advisor: PD Dr. Torsten Enßlin

2014–2017 **M.Sc. in Physics**,
Ludwig Maximilians Universität, Germany.
Thesis topic: The primordial magnetic field in our cosmic backyard
Thesis Advisor: PD Dr. Torsten Enßlin

2010–2014 **B.Sc. in Physics**,
Ludwig Maximilians Universität, Germany.
Thesis topic: Chemical phases of the ISM in a stratified magnetised box
Thesis Advisor: Dr. Philipp Girichidis

Research Interests

- **Magnetic field reconstructions** *(active)*
  Galactic magnetic fields are traced by various physical processes such as synchrotron radiation, dust polarization pr Faraday rotation. My goal is it to help in providing a three dimensional reconstruction of the Galactic magnetic field using these data sources.
- **The Galactic Faraday sky:** *(active)*
  The Faraday effect is an important tracer for magnetic fields and the thermal electron density in the Milky Way. I am currently working on refining our knowledge on the Galactic Faraday depth sky by including new data sets and taking advantage of correlations with other observables.
- **Primordial magnetic fields:**
  Large parts of the observable Universe are filled with magnetic fields of diverse strength and morphology. I gave an prediction on a lower bound for the magnetic field strength in cosmic voids and for the morphology of the magnetic field in our cosmic neighborhood.

Press Releases

- **Primordial magnetic fields:**
  - ⋆ The primordial magnetic field in our cosmic backyard. (*MPA Research Highlight April 2018*)
  - ⋆ Relics of the Big Bang. (*MPG Research Highlight April 2018*)
  - ⋆ Astrophysicists calculate the original magnetic field in our cosmic neighbourhood. (*phys.org*)
- **Galactic Faraday Sky:**
  - ⋆ Inner view of the Milky Way's magnetic field shows spiral structure. (*MPA Research Highlight March 2022*)

Technical and Professional Skills

- **Programming languages:** Proficient in Python. Working knowledge of C++.
- **Methods:** Bayesian analysis, Variational Inference, Machine Learning, Nested Sampling
- **Data science:** Development of robust likelihoods for contaminated datasets, Information Field Theory
- **Other tools:** version control repositories (Git, SVN), LaTeX
- **Operating Systems:** Linux (Ubuntu) and Windows.

Conferences and Workshops

- **2021:** Astronomical Observatory of Cagliari, Colloqium, Online
  Talk: "The Faraday sky and its connection to the Galactic magnetic field".
- **2021:** IMAGINE Collaboration, Conference, Leiden
  Talk: "The Galactic Faraday sky 2020".
- **2021:** MKSP Milky Way working group, Meeting, Online
  Talk: "The Galactic Faraday sky 2020".
- **2020:** IMAGINE Collaboration, Workshop, Online
  Talk: "The Galactic Faraday sky 2020".
- **2019 Lyon:** EWASS, Conference (Invited Talk), University of Lyon
  Talk: "The Galactic Faraday depth sky revisited".
- **2019 Nijmegen:** IMAGINE Collaboration, Workshop, Radboud University
  Talk: "The Galactic Faraday depth sky revisited".
- **2019 Aachen:** Big Data Science in Astroparticle Research, Workshop, RWTH
  Supervision of NIFTy Tutorial
- **2018 Garching:** Institute seminar, Max Planck Institute for Astrophysics
  Talk: "The primordial magnetic field in our cosmic backyard".
- **2018 Garching:** The High Energy Universe, Conference, Excellence Cluster Universe
  Talk: "The primordial magnetic field in our cosmic backyard".
- **2017 Mumbai:** CEBS (Centre for Exellence in Basic Sciences)
  Talk: "The primordial magnetic field in our cosmic backyard".
- **2017 Pune:** Plasma Universe and its structure formation, Conference, IUCAA (The Inter-University Centre for Astronomy and Astrophysics)
  Talk: "The primordial magnetic field in our cosmic backyard".
- **2016 Berlin:** DFG Workshop, Harnack Haus
  Talk: "The primordial magnetic field in our cosmic backyard".

Teaching

- 2021/22 Supervision of a Master student on *Inferring The Galactic Magnetic Field with HII clouds*
- 2020 Supervision of two Master students on *Detecting Bioluminescence trough Neutrino Telescopes*
- 2019 Preparation of exercise sheets for Information Field Theory lectures.
- 2017-2018 Supervision of high school students at Max Planck Institute for Astrophysics.
